# Welcome to Loco :train:

Loco is a web and API framework running on Rust.

This is the \*\*lightweight-service starter\*\* which comes with no database or state dependencies.

## Quick Start

Start your app:

. . .

\$ cargo loco start

Finished dev [unoptimized + debuginfo] target(s) in 21.63s

Running 'target/debug/myapp start'

:

controller/app\_routes.rs:203: [Middleware] Adding log trace id
